Experience

Vet It (vetit.herokuapp.com), *Back-End Contract Developer*
A platform for military veterans to find and post reviews on job and education experiences.
- Implemented search bar with MongoDB query using indices.
- Facebook and LinkedIn authentication via OAuth 2.0 and Passport.js
- Faster page loading using AJAX for many user inputs.

Evie (evie.herokuapp.com), *Team Member, Back-End Developer*
A real-time event-planning app for friend groups trying to go out. Built during a 24-hour Hackathon as part of Horizons program.
- Worked closely with MongoDB, Node.js, Express.js, Passport.js, jQuery, and AJAX
- Two-factor authentication using 4-digit code sent to phone via Twilio API.
- Utilized cookie-session to save voting states of users.

Double Message (mydoublemessage.herokuapp.com), *Team Member, Full-Stack Developer*
Double Message allows you to see and manage conversations via multiple channels, such as email and SMS, from a single view.
- Worked closely with MongoDB, Node.js, Express.js, Passport.js, jQuery

Skills

Programming: Java, JavaScript, HTML5, CSS3, jQuery, Git, Express.js, React.js, MongoDB, Flexbox, Node.js, Bootstap, Passport.js, C++
Languages: Spanish (First language)
Other: MS Office, MS PowerPoint, Social Media, excellent verbal and written communication skills
